

Liberty Hardwoods, Inc. is proud to announce a new species added to our lumber and plywood product lines, **Red Grandis!**

Red Grandis is a fast growing, sustainable hardwood offered as an alternative to mahogany and other tropical hardwoods. Versatile and strong, this beautiful hardwood is 100% pure FSC certified and can be used for a full range of interior and exterior applications. Exceptional characteristics include uniform color, texture, weight and machinability.

General Description

This straight grained, medium textured hardwood has a consistent pink color, ranging from white cream to light rose.

Working Properties

Red Grandis machines well and works well with hand tools. The wood saws and planes cleanly. Screw holding and gluing properties are both good. Glue block strength tests indicate similar strength to mahogany. Consistent grain quality takes all finishes well.

Common Uses

Quality furniture, joinery, turnery, carving, mouldings, doors, windows, kitchen cabinets, flooring, etc.

The mark of
responsible forestry
